Preface	iii
The Interviewer	iv
Alfred S. Harrison: A Biographical Sketch	ix
Career Information	xi
Education	1
Civil Engineering Curriculum	2
Graduate Study at the University of California at Berkeley	3
Hans Albert Einstein	3
Universities Specializing in Hydraulics and Sedimentation	4
Professor Joe Johnson	7
Coastal Engineering Research Center (CERC) and Thorndike Saville	7
Prominent Classmates from the University of California	9
Transfer of Hydraulic Concepts and Technology from Germany and Europe	10
Thesis Work on Sedimentation and the Interest of the Corps of Engineers	12
Don Bondurant and Employment with the Omaha District	13
The Mainstem Dams on the Missouri River in the Early 1950's	13
Work in the Omaha District's Sedimentation Program	15
Nick Barbarossa and the General Hydraulics Section	16
Calculating Backwater, Flood, and Water Surface Profiles	16
Margaret Petersen	18
Frank Campbell	20
Early Computer Usage for Studies of Reservoir Operations	20
Hydraulics and Hydrology in the Omaha District and Missouri River Division	21
Omaha District	22
Missouri River Division	23
Chief, Technical Engineering Branch, Missouri River Division	27
Sediment Section Field Teams	29
Change from the Missouri River Division to the Missouri River Region	30
Planning and Completing Diversions at Fort Randall, Garrison, Gavins Point, Oahe, and Big Bend Dams	32
Early Computer Modeling in the Omaha District	34
Don Bondurant	38
Missouri River Sediment Advisory Board	39
Hydraulics and Sedimentation in the Omaha District	41
The Emergence of Planning and Organizational Restructuring	42
Omaha District's Engineering Division under Jerry Ackermann	43
Ed Soucek	44

Wendell Johnson	45
Åke Alin	47
Contacts with Hydraulics Personnel at the Office of the Chief of Engineers	48
Gail Hathaway and the Spillway Design Flood	48
Corps of Engineers and Bureau of Reclamation Dam Design Criteria	49
Other Contacts at OCE	51
Al Cochran	52
Sam Powell	52
Jake Douma	53
Omaha District Work with the Waterways Experiment Station (WES)	54
WES and the Missouri River Division Laboratory	55
Channel Stabilization Committee Projects	56
Hydrologic Engineering Center (HEC)	57
The Use of Consultants	58
Surge Tanks on the Mainstem Dams	59
Developing WHAMO	61
Surge Tank Design	62
Penstock Designs	63
Replacement of Penstocks at Fort Peck Dam	63
Second Powerhouse at Fort Peck Dam	66
Changes in the Fort Randall Design	67
Sedimentation Studies and Wind Wave Protection in the Mainstem Reservoirs	68
Design and Construction of Large Earth Dams	70
Soil Mechanics and Geotechnical Considerations	70
Construction Planning	72
Tainter Gates	73
Computer Modeling and Management of Mainstem Reservoir Operations	74
Degradation of the Missouri River below Gavins Point	77
Natural and Artificial Cutoffs	78
Degradation and Reregulation of Flows on the Missouri River	81
Problems with the Delta of the Niobrara River	83
The Platte River	85
Sedimentation Issues	86
Reservoir Operations	89
Benefit-Cost Calculations	90
Environmental Changes in the Missouri River's Regimen	91
Effect of the National Environmental Policy Act (NEPA)	92
Flood Control Reservoir System in the Omaha Area	94
Flood Control Projects	95
Flood Protection in Major Urban Areas	97
Omaha and Lincoln, Nebraska	99

Sioux City, Iowa	99
Denver, Colorado	100
Kansas City Area	100
Other Urban Projects	101
Problems with Project Approvals at OCE	101
Authorizing and Funding Local Protection Projects	103
Effect of the Water Resources Development Act of 1986	104
Recreation Benefits	107
Estimating Project Benefits and Costs	108
Computer Model for Calculating Flood Damages	111
Navigation Improvements on the Missouri River	112
The Channel Stabilization Committee	116
Environmental and Water Quality Operations Studies	119
Computers in the Missouri River Division	119
Relocations of Towns, Roads, Railroads, and Utilities	123
Career in the District and Division	125
Organizational Structure	126
Bob Pafford	128
The Role of the Military Leadership	130
Tom Hayes	131
Jack Morris	132
Chuck Dominy	132
Mark Sisinyak	133
Craig Cannon	133
Clyde Selleck	134
Bill Ray	135
Centers of Expertise	136
Hazardous Waste, Rocky Mountain Arsenal, and the Superfund	138
Military Construction	141
Corrugated Metal Roofing	142
Underground Heat Distribution Systems	142
The Air Force as a Customer	143
Army Military Construction Work	145
Experience in Consulting Work	146
Taiwan	146
Ecuador	147
Bangladesh	148
Pakistan	149
Indonesia	151
Expert Testimony	152
Conclusion	152
